Programming Assignment 2 : Helicopter game

This is a basic framework for a helicopter game written in javascript and is modeled after the real Helicopter game copyright by: *seethe.co.uk.* The game is still in early development stage but demonstrates basic particle system with collision detection. Unzip the folder to the desktop, and open the html file using a web browser.

This game is also available on JSFiddle: https://jsfiddle.net/mjschmidt13/kerh7Lw9/
